

Review of current management and development of future management related to the cockle fisheries within the Kent and Essex IFCA District

Listening Phase Questionnaire

Questionnaire information and background

Cockle stocks within the KEIFCA District are currently managed under two different legislative management regimes. The cockle stocks in the majority of the district are managed under a KEIFCA byelaw called the Cockle Fishery Flexible Permit Byelaw (CFFPB). However, the main production beds contained within a specific area of the Thames Estuary are managed by KEIFCA under a Statutory Instrument called the Thames Estuary Cockle Fishery Order 1994 (TECFO).

On the 28 September 2024 the TECFO, which started in 1994 for a period of 30 years, will end. Although this is three years away, the ending of the TECFO provides an opportunity to review how cockle stocks are managed, as well as the underpinning legislation, across the District including within the current TECFO area.

The purpose of this questionnaire is to collect information and views on the current management and running of the cockle fisheries with the district of Kent and Essex IFCA, both within the Thames Estuary Cockle Fishery Order (TECFO) area and the rest of the district that is covered by the KEIFCA cockle fishery flexible permit byelaw (CFFPB).

The questionnaire also helps gather views on how the cockle fisheries could be run in the future, with specific focus on the regulatory legislation that could be used to manage the fishery (Regulating Order or a Byelaw) and the possible mechanisms governing how fishers could access and exit the fishery. We would strongly encourage interested stakeholders to fill in as much of the questionnaire as possible as replies will help KEIFCA members understand your issues, gather data and numbers that we will use to evaluate potential management options and help us prioritise work and possible management options.

Throughout the questionnaire you will find BLUE boxes which provide background information for you to refer to prior to answering.

Undertaking a review of the current management and developing future management for the cockle fisheries within the KEIFCA District is complex, with many different stakeholders with many different views. Whilst there are a lot of questions within this questionnaire, we believe that it is critical to understand all points of view and collect as much information as possible during this listening phase.

To facilitate you working through this questionnaire we have broken it down into 3 sections. Section 1 is on your background. Section 2 is a non-technical questionnaire and section 3 is a technical (from a fisheries perspective) questionnaire. You can complete just one section or both sections. Section 3 is then broken down into the following five categories:

- A. How the fisheries currently work
- B. Regulatory options
- C. Access to the fisheries
- D. The economics of the cockle fisheries
- E. The proposed process for reviewing and developing management

How to respond

Please email your completed questionnaire to info@kentandessex-ifca.gov.uk. The closing date for receipt of questionnaires for this listening phase is 8th November 2021.

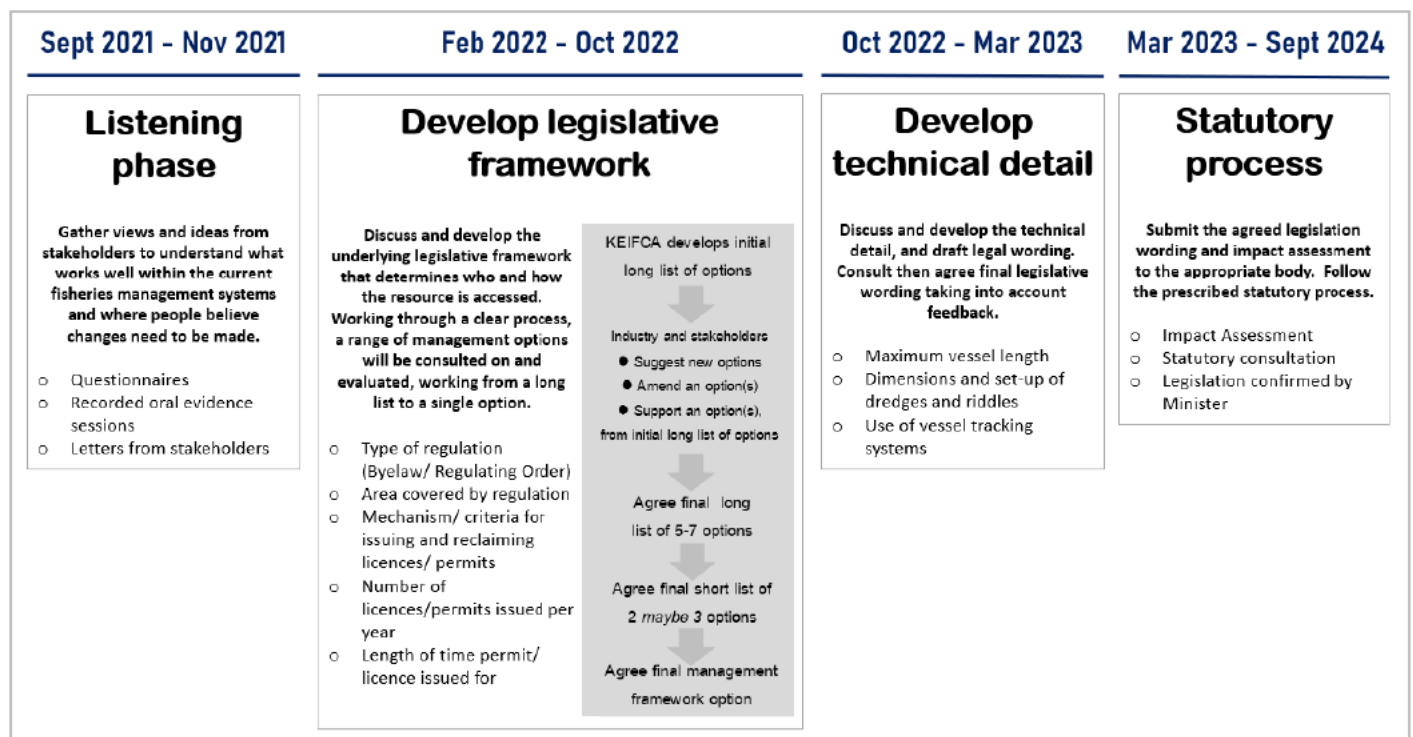

Any questionnaires received after 8th November 2021 will not be considered.

Who we are

Kent and Essex Inshore Fisheries and Conservation Authority (KEIFCA) was established on 1st April 2011 under provisions contained within the Marine and Coastal Access Act 2009 to manage the sustainable exploitation of sea fisheries resources within an area of over 3,412 km², which extends from the east end of Rye Bay in Kent to the northern boundary of Essex on the River Stour, including the development and implementation of management measures and the enforcement of compliance with such in addition to national and international fisheries legislation.

Consultation timeline and decision-making process

The proposed process to review and develop future cockle management is split into a number of time defined steps that will build on each other, with the overall aim of confirming new legislation (in whatever form it might look like) to be in place for when the current TECFO legislation ends in September 2024.

How to get more information

Contact:

- Website: www.kentandessex-ifca.gov.uk
- Email: info@kentandessex-ifca.gov.uk
- Telephone: 01843 585310

Privacy Policy

KEIFCA has a legal duty to manage the sustainable exploitation of sea fisheries resources within its district. These are set out in the Marine and Coastal Access Act 2009. The Authority cannot deliver this duty without processing personal data. For full details of our privacy policy go to our website <https://www.kentandessex-ifca.gov.uk/privacy-policy>.

How we use your personal information

We collect and use this information in order to:

- facilitate your participation in our consultation and engagement activities
- understand your views about a particular topic or KEIFCA activity
- analyse consultation and engagement activity
- communicate information to you about engagement and consultation opportunities, events and other initiatives, if you have requested to be kept informed

How long your personal data will be kept

We will hold any personal information provided by you as part of engagement or consultation activity for up to six years following the closure of a consultation.

Reasons we can collect and use your personal information

For engagement and consultation activity carried out in respect of this consultation we rely on UK GDPR Article 6(1)(e): 'processing is necessary for the performance of a task carried out in the public interest' and Article 6(1)(c) 'for compliance with a legal obligation to which the controller is subject' as our lawful basis.

Information provided to the IFCA through all its consultations/listening phases will be provided in its entirety to Members of the IFCA. Redacted copies of this information (ie personal/identifying details are removed) will be made available on a public facing sharepoint which can be accessed by anyone who wishes to view it by applying to KEIFCA at info@kentandessex-ifca.gov.uk or by phone to 01843 585310. No personal information which can identify you, such as your name or email address, will be used in producing reports unless you specifically allow us to. We will follow our Data Protection policies to keep your information secure and confidential.

Section 2 – Non-technical Questionnaire

We are keen to hear from anyone who has an interest in the Thames and the KEIFCA cockle fishery as we are currently reviewing all the current cockle fishery management and regulations and looking to develop future cockle management. Whether the cockle fishery provides you with a direct or indirect income, is a valued habitat supporting a wider ecosystem, an important historic cultural activity that has taken place for generations or part of the local identity of your town, we want to hear from you.

Cockle fishing in KEIFCA District

The cockle fisheries within the Kent and Essex IFCA District are some of the oldest and most important cockle fisheries in Europe, and cockle harvesting has been a mainstay in the Thames Estuary for centuries providing a key industry for the local coastal fishing community. Due to the proximity to London, Thames cockles have long been associated with day trips to the seaside, be it from paddle steamers in the 19th Century to modern day family trips to ports like Leigh-on-Sea or Whitstable. The modern-day cockle fisheries provide income and jobs for a large number of fishermen, local processors and wider support companies, and cockles are sold into national and international markets usually as a canned product.

Historically, the cockle fishery was a year-round hand-raked fishery, focused on South Essex and North Kent beaches. Local fishermen would sail to the main harvesting grounds, allow their vessels to dry out on the beach and then hand-rake cockles into small net bags which were then transferred to baskets. The fishing vessels would then re-float on the flood tide, travel back to their home ports, and cook the cockles in shore-side sheds before selling them direct to the public. Over time, the industry became more mechanised and hydraulic suction dredges began to be used by the industry in the 1960s. The development of new harvesting systems saw the introduction of the solids handling pump in the early 1990s which have been further developed into the suction dredges used by the fleet today.

Biology and ecology of the cockle fisheries

The cockle (*Cerastoderma edule*) is a common shallow-burrowing bivalve that is usually found in the middle to low shore areas of beaches and mudflats. Cockles are generalist, opportunistic filter feeders; they have very short siphons and generally live within the top 5 cm of the surface of the beach so that they can reach the overlying water for feeding and respiration.

Spawning normally occurs in the summer, and individuals can produce between 200,000 - 700,000 eggs per animal. Cockle larvae are planktonic, and typically spend around 3-5 weeks floating in the sea before they start to settle. At many locations, settlement of small cockles, known as spat, may initially occur low on the shore, followed a few weeks later by movement to a secondary settlement higher on the shore. Most cockles live for between 2-4 years, but some individuals have been found to be over 10 years old. Cockles have many predators at different stages in their life history, including brown shrimp, shore crabs, starfish, snails, worms, fish (flounder, plaice) and a variety of birds particularly oystercatchers and knots.

Fishing with Marine Protected Areas

The cockle fishery takes place with a complex mosaic of Marine Protected Areas (MPAs) and the cockle stocks provide food for a wide range of bird and fish species, whilst also providing other wider environmental benefits such as filtering seawater and CO2 capture. As the fishery occurs within the boundary of the Essex Estuaries European Marine Site, Habitat Regulation Assessments (HRAs) are completed on an annual basis in order to ensure the compatibility of the fishery with the designated features of the site. Bi-annual stock assessments are used to assess the cockle stocks within the site and help inform a number of key technical, temporal and spatial management measures that manage the impact of the fishery within the site.

S2.1. How do the current cockle fisheries within the KEIFCA District impact you, your business or your interests and why do you think it is important?

CURRENTLY WE UNLOAD THREE OF THE VESSELS WITH FORKLIFTS, AND OFFER BERTHING FOR THE TWO OF THEM. SOME OF THE VESSELS USE US FOR MARINE ENGINEERING. HOWEVER THEIR BUSINESS CANNOT SUSTAIN US AND THEREFORE THEIR BUSINESS MAYBE 5% ON AVERAGE OF OUR TURNOVER. IF THE CURRENT LICENCES/PERMITS ARE INCREASED, THEN NATURALLY THE TRIP ALLOCATION WOULD DECREASE, THEREFORE, I DON'T THINK THAT THEY WOULD SPEND AS MUCH MONEY ON MAINTAINING THEIR VESSELS.

S2.2. What do you think the priorities for the management of the KEIFCA District cockle fisheries should be between now and 2054?

SUSTAINABILITY AND ENVIRONMENTAL IMPACT. I THINK KEIFCA HAVE DONE A FANTASTIC JOB TO DATE OF MANAGING THIS FISHERY. IT IS A FISHERY THAT IS HARD TO PREDICT, AND WITH THE CURRENT ECONOMIC AND COVID SITUATION, NEEDS TO BE CAREFULLY LOOKED AFTER. WE DO NOT KNOW WHAT THE FUTURE HOLDS, HOWEVER LOCALLY THE INDUSTRY EMPLOYS A LOT OF PEOPLE, AND IS FRAGILE.

S2.3. Are there any key objectives or important aims you think should be included in any future management criteria of cockles within the KEIFCA District?

TO ENSURE THAT LARGE COCKLES ARE NOT JUST TARGETED AND GROUNDS WORKED TOO HARD. IF THE GROUND IS FULL AND THE COCKLES ARE SMALLER THAN AVERAGE THEY STILL NEED TO BE CAUGHT, AND REMOVED TO ALLOW THE COCKLES TO GROW. ALL VESSELS VMS WITHIN THE DISTRICT

S2.4. What do you think could harm the management of the cockle fisheries within the KEIFCA District between now and 2054?

TOO MUCH PRESSURE ON THE GROUND OVER FISHING. IF LOTS OF OTHER VESSELS ARE WORKING THE GROUND AND COCKLES ARE BEING BROKEN, OR LARGE COCKLES TARGETED THEN THE BEDS WILL STRUGGLE TO RECOVER.

S2.5. Is there any new technology that you think could be key to unlocking the long-term sustainable value of the cockle fisheries and protecting the marine ecosystem?

I WOULD LIKE TO EXPERIMENT WITH EXTENDING GEAR TO OPEN UP DEEPER AREAS. REDESIGN A DREDGE AND BLADE TO REDUCE BREAKAGES BEFORE THE PUMP. I HAVE ALREADY DESIGNED A RIDDLE TO TRY AND REDUCE BREAKAGES. HOWEVER THIS COSTS MONEY AND CANT BE DONE ON A WHIM. MAYBE PERMIT HOLDERS/LICENCE HOLDERS CAN PUT IN MONEY TO TRY AND IMPROVE GEAR ANNUALLY

S2.6. Are there any particular aspects of the current cockle fisheries management measures that you think should change?

I THINK THAT ALL COCKLES SHOULD BE LOADED INTO SAME MEASURED BAGS. MAYBE THESE BAGE SHOULD BE SUPPLIED BY KEIFCA AND SOLD TO THE VESSELS ENSURING THEY ARE ALL THE SAME. IT WOULD SAVE A LOT OF TIME IN MEASURING AND MARKING. I THINK THAT MAYBE IN LEIGH WHERE THERE IS A LARGE FLEET THEN MAYBE SOMEONE LOCAL CAN BE APPOINTED TO SUPERVISE CATCHES REGULARLY, AND RELAY INFORMATION, WITH KEIFCA OVERSEEING, GIVING KEIFCA MORE TIME TO VISIT OTHER PORTS.

S2.7. Are there any particular aspects of the current cockle fisheries management measures you think are important to keep?

THE PRESENCE OF KEIFCA OFFICERS OR REPRESENTATIVES IS IMPORTANT FOR RELAYING INFORMATION, REGARDING CATCH RATES ETC. THE VESSELS/DRONE PLAY AN IMPORTANT PART IN ENFORCEMENT. THE SUCCESS OF THE CURRENT REGULATING ORDER HAS TO BE CONSIDERED, AND THAT IT CURRENTLY WORKS AS IS. TECFO VESSELS HAVING VMS IS A MUST.

S2.8. Do you have any other comments you would like to make on the review of current, and development of future, cockle fishery management within the KEIFCA District?

IF THE REGULATING ORDER WAS CHANGED AND MORE PERMITS ISSUED THEN MY CONCERNS WOULD BE 1. HOW MANY PERMITS. 2. HOW IS IT DECIDED UPON WHO GETS A PERMIT. 3. THE GROUNDS WONT TAKE FORTY BOATS WORKING ON THEM, THEREFORE POENTIALLY RISKING A SUSTAINABLE FISHERY. 4. ARE WE GOING TO ENSURE THAT THE PERMITS/LICENCES ARE WHOLLY UK OWNED, AND CANT BE TRANSFERRED. ALL VESSELS TO HAVE VMS

Section 3 – Technical Questionnaire

A. How the fisheries currently work

In this section we would like to get your views on the current underpinning processes KEIFCA uses to manage the cockle fisheries in the TECFO area and wider cockle fishery flexible permit byelaw (CFFPB) area. The processes KEIFCA have developed to manage the cockle fisheries have evolved over the last 25 years and now play an important part in annual assessments (HRA and MCZ assessments) that mean the fisheries can take place within Marine Protected Areas.

TECFO annual management process

The annual cockle fishery cycle starts in late March (usually over the Easter weekend) with the 5-7 day quadbike survey of the Maplin Sands cockle stocks. Working over a low tide window officers complete a quadrat survey where cockles from each quadrat are counted, aged and weighed to provide data on the condition of the stock. Areas within the TECFO area that can't be reached by quadbike are surveyed by sea using a day grab deployed by either FPV Tamesis or FPV Nerissa and collect the same data. Overall, 1200 samples are taken over a 4 week period and this helps officers calculate a Total Allowable Catch (TAC) and develop annual management measures including temporal and spatial restrictions such as closed areas, open/close times and trips per week etc.

By the beginning of May, the surveys and the analysis have been completed, and a management meeting is held (usually at Leigh-on-sea) with the TECFO licence holders and their representatives. Officers outline the TAC for the year and run through the proposed management measures, there is then a discussion about the proposals, and where possible, officers will answer questions. Running in conjunction with this KEIFCA officers complete an annual HRA for the fishery and submit it to Natural England.

Using the results from the survey, the HRA requirements and the feedback from the industry, officers then finalise the management papers and recommendations that are put before the Authority at the May quarterly meeting. Stakeholders including members of the industry can attend the public quarterly meeting and (following standing orders) can comment on the proposals and suggest different alternatives. KEIFCA members then discuss the management paper and vote on the recommendations.

Once the management measures have been agreed, the fleet prepares for the upcoming fishery and KEIFCA officers start inspecting the gear that will be used in the fishery (including biosecurity inspections). The TECFO fishery usually starts in late June and, following the agreed schedule of fishing trips per week, each vessel can land 13.6m³ of cockles per trip.

Cockle vessels are inspected on a very regular weekly/biweekly basis by officers and fishing gear is inspected at the start of the season in-situ to make sure it is working within legal limits. Each vessel operating within the TECFO fishery is required have a Vessel Monitoring System (VMS) which reports the location of the vessel every 5 minutes. Data from this VMS system, when analysed at the end of the fishing season, can be used to calculate the physical impact of the cockle dredges on the seabed. This information is used to provide information regarding the impact and sustainability of the cockle fishery which occurs within a complex mosaic of MPA's.

The second annual cockle survey takes place in mid-September and repeats the quadbike survey on the Maplin Sands but only samples every other survey point. Information from this survey feeds into the management process and is used to adapt management measures if required. A report on the cockle fishery is then presented to the Authority at the September quarterly meeting with any additional recommendations if required. The TECFO fishery usually ends in October and an annual cockle report is completed prior to the January Authority meeting.

CFFPB fishery annual management process

As with the TECFO fishery, the annual management cycle starts with a spring survey where cockle stock data (numbers, density, age and weight) are collected in exactly the same way as within the TECFO area. As the cockle stocks outside the TECFO area are more discrete and less consistent, the stocks need to be above levels agreed in the management plan that accompanies the byelaw.

Management papers with recommendations are presented to the Authority at the May quarterly meeting. Due to the nature of the distribution and amount of stock available, only one area in the last 10 years has met the criteria for the cockles to be fished. This means the decisions and recommendations to manage this fishery are historically very limited and have been to allow either 1 trip or very occasionally 2 trips within a 1-2 week window in early October. As with the fishery within the TECFO, a HRA is completed and agreed before the fishery is opened.

If the fishery is opened, a significant enforcement operation swings into action, with biosecurity and gear checks being undertaken in-situ before the fishery starts. Unlike the TECFO fishery, VMS tracking is not universally available and so a significant sea-based enforcement presence is deployed to ensure that fishing takes place as per the agreed management measures.

S3A1. How would you rate the following aspects of the management of the current cockle fisheries?

(a) Annual cockle surveys and stock assessments

Fishery	Very good	Good	Okay	Neither good nor bad	Poor	Very poor
CFFPB	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input checked="" type="checkbox"/>	6 <input type="checkbox"/>
TECFO	1 <input type="checkbox"/>	2 <input checked="" type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>

Explain the rationale for your response here

2020 SURVEYS WERE POOR AS NO ONE COULD CATCH ANYTHING. IT WAS A VERY EXPENSIVE OPERATION FOR OUTSIDE THE AREA VESSELS TO SET UP. I ONLY HAVE LICENCE HOLDER REPORTS TO GO ON REGARDING THE TECFO SO NOT REALLY FAIR TO JUDGE

(b) Reports

Fishery	Very good	Good	Okay	Neither good nor bad	Poor	Very poor
CFFPB	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input checked="" type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>
TECFO	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>

Explain the rationale for your response here

MAY HAVE MISSED IT BUT HAVE NOT SEEN A REASON FOR THE 2020 SITUATION. IT COST ME OVER TEN THOUSAND TO RIG UP. I ONLY HAVE LICENCE HOLDER REPORTS TO GO ON REGARDING THE TECFO SO NOT REALLY FAIR TO JUDGE

(c) Annual meetings and management process

Fishery	Very good	Good	Okay	Neither good nor bad	Poor	Very poor
CFFPB	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>
TECFO	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>

Explain the rationale for your response here

N/A HAVENT BEEN ASKED TO GO TO A CFFPB AND TECFO DOESN'T APPLY

(d) Setting Annual TAC (Total Allowable Catch)

Fishery	Very good	Good	Okay	Neither good nor bad	Poor	Very poor
CFFPB	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input checked="" type="checkbox"/>	6 <input type="checkbox"/>
TECFO	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>

Explain the rationale for your response here

TECFO DOESN'T APPLY THE CFFPB WAS A DISASTER

(e) Enforcement

Fishery	Very good	Good	Okay	Neither good nor bad	Poor	Very poor
CFFPB	1 <input checked="" type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>
TECFO	1 <input checked="" type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>

Explain the rationale for your response here

THE PRESENCE OF KEIFCA IS VERY VISIBLE AND EFFECTIVE

(f) Use of vessel tracking

Fishery	Very good	Good	Okay	Neither good nor bad	Poor	Very poor
CFFPB	1 <input checked="" type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>
TECFO	1 <input checked="" type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>

Explain the rationale for your response here

FROM EVIDENCE EVERY VESSEL WORKING WITHIN ALL KEIFCAS AREAS SHOULD HAVE VMS

(g) The current mechanism for issuing licences to the TECFO

Fishery	Very good	Good	Okay	Neither good nor bad	Poor	Very poor
TECFO	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>

Explain the rationale for your response here

N/A AS PART OF A REGULATING ORDER THAT CANT BE CHANGED PRESENTLY

(h) The current mechanism for issuing permits in the CFFPB fishery

Fishery	Very good	Good	Okay	Neither good nor bad	Poor	Very poor
CFFPB	1 <input checked="" type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>

Explain the rationale for your response here

ANNUAL SYSTEM THAT WORKS. I THINK THAT WE SHOULD KNOW SOONER AS IT TAKES TIME FOR NONE TECFO BOATS TO SET UP, AND COSTS A LOT OF MONEY. IT ISNT FINANCIALLY VIABLE SETTING UP FOR ONE POTENTIAL TRIP AT PRESENT.

S3A2. The TECFO fishery is Marine Stewardship Council (MSC) accredited. Do you think the MSC accreditation is important to the fishery?

YES. IT HELPS MONITOR AND TRACK CATCH RATES, STOCKS, SHOWS TRENDS AND POSSIBLE PROBLEMS ETC. MEANS IT IS A "GOLD STAR" FISHERY, VERY WELL MANAGED. HIGHLIGHTS THE FISHING INDUSTRY AND MAKE IT MORE TRANSPARENT.

S3A3. How could the TECFO fishery be improved?

I THINK THAT VESSEL AND CREW SAFETY SHOULD BE CONSIDERED. IF ITS TOO WINDY FOR A SMALLER VESSEL TO GO TO SEA, THEN THEY CANT GET THEIR TRIP BACK AFTER THE FRIDAY. I THINK THAT ALTHOUGH VERY HARD TO POLICE AND ENSURE TRUTHFULNESS, SOMETIMES VESSELS GO TO SEA WHEN MAYBE THEY SHOULDN'T.

S3A4. How could the CFFPB fishery be improved?

I THINK THAT MORE AREAS COULD BE SURVEYED, AND VMS VESSELS SHOULD BE ALLOWED TO ENTER ALL OUTSIDE AREAS, AS LONG AS THE RELEVANT TESTS HAVE BEEN CARRIED OUT. THE GROUNDS ARE NOT LARGE ENOUGH TO WARRANT THE HUGE OUTLAY OF COCKLING FOR TWO TRIPS. I ALSO THINK THAT PERHAPS TECFO VESSELS SHOULDN'T FISH THERE. THEY ONLY REALLY DO FOR TRACK RECORD.

S3A5. Are there any specific problems with how the current TECFO or CFFPB fisheries are run?

NO TO TECFO, ONLY THE SELLING OF BUSINESSES. CFFPB HAS BEEN HISTORICALLY HARD TO RUN DUE TO THE NUMBER OF VESSELS, AND THE FISHERMANS NATURE, IT SHOULD BE LOOKED INTO MAKING A REASONABLE FISHERY, WHICH IS FINANCIALLY VIABLE.

S3A6. Any other comments or thoughts on current management?

NOT AT PRESENT

B. Regulatory options

There are two main legislative options or tools available for KEIFCA to manage the cockle fisheries into the future cockle; create a regulating order or make a byelaw. At present we have both legislative options functioning within our district helping us to manage our cockle fisheries. The TECFO area was set up in 1994 and matches the Port of London Authority boundary. The CFFPB covers the rest of the KEIFCA district.

When looking at future cockle fishery management one of the first, and most significant decisions KEIFCA members will need to make, will be to look at the advantages and disadvantages of these different legislative options, think about the area they might regulate, and if two different regulatory options were chosen how they would work together.

Regulating Orders

Regulating Orders are special legislation designed to encourage the setting up and improved management of natural shellfisheries. A Regulating Order may grant exclusive fishing or management rights within a designated area of sea or tidal waters, to specifically regulate one or more named species of shellfish (i.e. cockles in the Thames). Regulating Orders are granted directly from DEFRA for a set period, normally 20 to 30 years but can be set up to run as long as 60 years.

Under a regulating order it is possible to regulate and restrict fishing for, dredging, or otherwise taking shellfish covered by the order. Under a Regulating Order the grantee (KEIFCA) can:

- issue licences to others allowing them to take shellfish within the designated area
- set conditions and restrictions that licence-holders must observe when they take shellfish
- manage the shellfishery
- exclude unlicensed people from the shellfishery

Grantees of Regulating Orders must also provide the DEFRA with annual returns, detailing activity in the fishery on a yearly basis.

As they restrict the public right to fish in certain areas, it is important that they are carefully considered before being made. To protect the rights of anyone who has an interest in an area under consideration, all applications for an order must follow a formal procedure laid out by DEFRA and the application process can take up to a year for an order to be granted.

More information on Regulating Orders can be found here: <https://www.gov.uk/guidance/shellfisheries-several-orders-and-regulating-orders>

Byelaws

The ability to make IFCA byelaws is set out in the Marine and Coastal Access Act 2009 with the aim to strengthen and modernise the powers for IFCAs to manage inshore fisheries and the marine environment.

Byelaw powers were designed to be flexible and contain many of the key features of a Regulating Order (Byelaw provision equivalent to a regulating order provision underlined). Probably the most relevant provision when comparing IFCA byelaws to a regulating order is the ability to exclude unpermitted people from the fishery (156 (4) (c)). Although most byelaws issue permits on a yearly basis, permits can be issued to cover a longer period of time, this again is similar to one of the key features of a regulating order.

Provisions that may be made by a byelaw under section 156 include prohibiting or restricting the exploitation of sea fisheries:

- (a) in specified areas or during specified periods;*
- (b) limiting the amount of sea fisheries resources a person or vessel may take in a specified period.*

The provisions cover:

- *permits (including conditions for the issue, cost and use of permits)*
- *vessels*
- *methods and gear, (including the possession, use, retention on board, storage or transportation of specified items)*
- *protection of fisheries for shellfish, including monitoring by:*
 - (a) requiring vessels to be fitted with specified equipment;*
 - (b) requiring vessels to carry on board specified persons for the purpose of observing activities carried out on those vessels;*
- *marking of gear*
- *identification of items*
- *information that those involved in the exploitation of sea fisheries resources in an IFCA district must submit to the IFCA.*

More specifically, byelaws may:

- *prohibit or restrict the exploitation of sea fisheries resources in specified areas or periods or limiting the amount of resources that may be exploited or the amount of time a person or vessel may spend exploiting fisheries resources in a specified period.*
- *prohibit or restrict the exploitation of sea fisheries resources in an IFC district without a permit. IFCA's will be able to recover the costs of administering and enforcing a permit scheme, attach conditions to permits and limit the number of permits they issue under a particular scheme.*
- *prohibit or restrict the use of vessels of specified descriptions and any method of exploiting sea fisheries resources. The possession, use and transportation of specified items or types of items used in the exploitation of sea fisheries resources may also be prohibited or restricted. This would enable an IFCA to require the use of a particular method of sea fishing or an item used in sea fishing (for example to reduce by-catch) by means of a prohibition on the use of other methods and items.*

Unlike a Regulating Order a byelaw is not created to run for a specific period however in line with the "evaluate and adapt" section of the marine management cycle, an IFCA should continually monitor the effectiveness of a byelaw. When they are no longer effective, they should be repealed or modified. Section 158 of the 2009 Act makes provision for byelaws to cease to have an effect after a specified period (i.e., a "sunset clause"). Where possible, and in line with best practice, IFCA byelaws should include sunset clauses or specified review points.

Although like a regulating order it is the Secretary of State that signs the byelaw, the byelaw process is overseen initially by the MMO before being sent to DEFRA for a final review before signing. There is a clear byelaw making and conformation process that requires an accompanying impact assessment and has a statutory consultation process which in many ways is similar to the Regulating Order making and confirmation process. As with a Regulating Order the byelaw making and confirmation process can take up to a year before the byelaw is signed by the Secretary of State and then comes into force.

More information on IFCA byelaws can be found here: <https://www.gov.uk/government/publications/ifca-byelaw-guidance>

S3B1. What factors/issues should KEIFCA look to prioritise or maximise in developing new regulations?

HOW MANY BOATS MAY THERE BE. HOW DO YOU DECIDE HOW MANY. THE CURRENT FLEET CANNOT FINANCIALLY FISH ON TOO FEWER TRIPS, THEIR VESSELS ARE NOT MULTI PURPOSE SO THEY CANNOT FISH ELSEWHERE ON OTHER SPECIES VERY EASILY. DOES THE FISHERY ACCOMMODATE BOATS FROM ALL OVER THE UK. CAN LEIGH BOATS GO AND FISH IN OTHER AREAS LIKE THE WASH ETC.

S3B2. Do you think KEIFCA should develop underpinning objectives or criteria for the management of the cockle fisheries in the district to help direct future fisheries management? If you do, what do you think they should be?

I THINK THAT THIS SHOULD BE TALKED ABOUT ONCE A DECISIONS HAS BEEN MADE ABOUT THE TECFO.

S3B3. What do you see are the advantages/ disadvantages of a regulating order?

ADVANTAGES ARE IT GUARANTEES THE FISHERY FOR A PERIOD OF TIME ALLOWING OWNERS TO INVEST IN SAFE MODERN BOATS AND EQUIPMENT BOTH AT SEA AND IN FACTORIES. IT DOESN'T GUARANTEE THE QUALITY, QUANTITY OR PRICE, BUT IT DOES GIVE THE ENCOURAGEMENT TO INVEST. THE DISADVANTAGES ARE IT IS VERY HARD FOR KEIFCA TO ALTER ANYTHING, CHANGE ANYTHING, ENFORCE ANYTHING.

SCB4. What do you see are the advantages/ disadvantages of a byelaw?

THE ADVANTAGES ARE MORE POWERS TO KEIFCA, MAYBE STOP THE SALE OF LICENCES TO MEGA COMPANIES, MEANING THAT SITUATIONS CAN BE REVIEWED SOONER, RATHER THAN IN YEARS TO COME.

S3B5. Do you think that there should be a specific area of the District which is managed separately to the rest, as is currently the case with TECFO being sat within the area covered by the CFFPB?

Yes

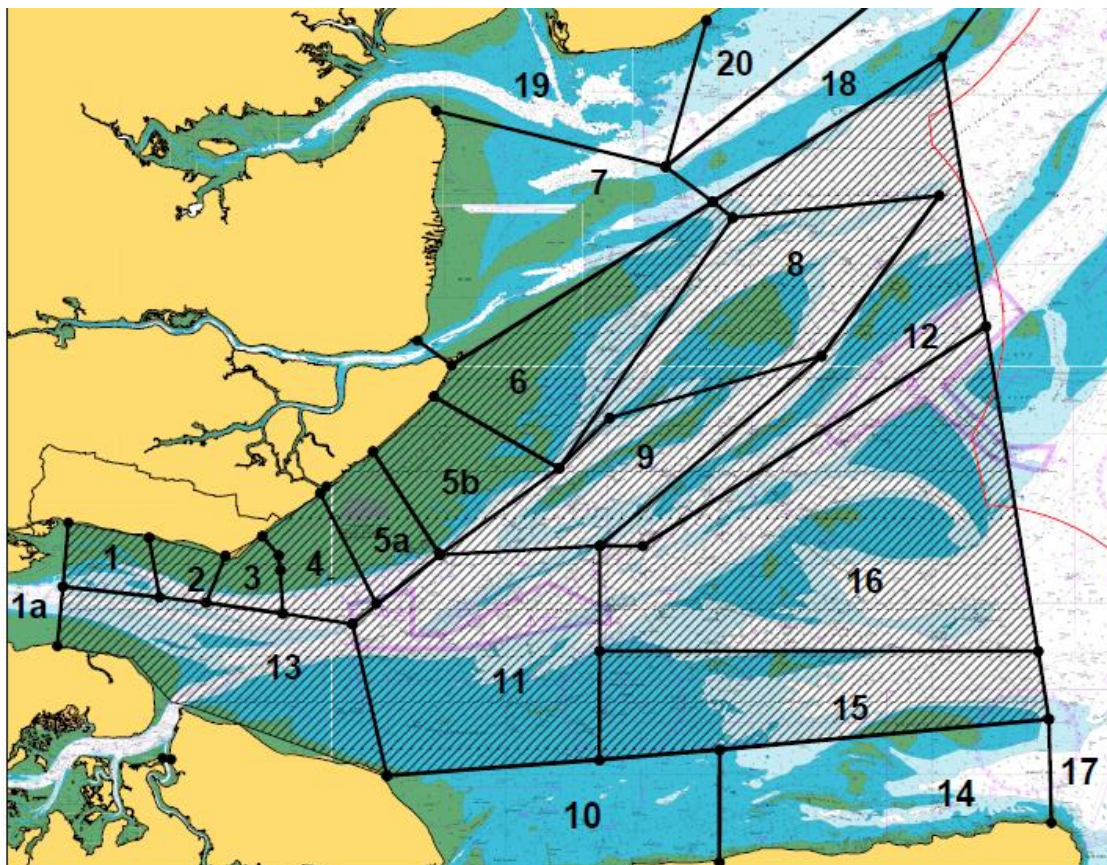

S3B6. If yes to C5 then should the specific area which is managed differently to the rest of the District be:

- Bigger than it is currently
- Smaller than it is currently
- The same size as it is currently
- Other:

Please explain your reasons why and provide more detail here:

THE OUTSIDE AREAS ARE NOT BIG ENOUGH, TO WORK FOR A NUMBER OF VESSELS. THE PRESSURE IS ON TO LOOK AT A PERMIT FISHERY, THIS SHOULD BE IN TWO SECTIONS ONE CURRENTLY TECFO AND THE OTHER CFFPB. THE TECFO SHOULD MAYBE LOOK AT LOSING A LITTLE BIT OF GROUND FOR THE SAKE OF THEIR FISHERY.

S3B7. If yes to C5 then which of the areas on the chart below do you think should be managed separately to the rest of the KEIFCA District? Hatched areas are currently managed under TECFO, the unhatched areas are currently managed under CFFPB. (Tick all that apply)

Southend Foreshore and Maplin Sands	North Thames	South Thames	Outer Thames and Channel Coast
<input type="checkbox"/> Area 1a	<input type="checkbox"/> Area 7	<input type="checkbox"/> Area 11	<input type="checkbox"/> Area 17
<input checked="" type="checkbox"/> Area 1	<input checked="" type="checkbox"/> Area 8	<input type="checkbox"/> Area 13	
<input checked="" type="checkbox"/> Area 2	<input checked="" type="checkbox"/> Area 9	<input type="checkbox"/> Area 14	
<input checked="" type="checkbox"/> Area 3	<input type="checkbox"/> Area 10	<input type="checkbox"/> Area 15	
<input checked="" type="checkbox"/> Area 4	<input type="checkbox"/> Area 12	<input type="checkbox"/> Area 16	
<input checked="" type="checkbox"/> Area 5	<input type="checkbox"/> Area 18		
<input checked="" type="checkbox"/> Area 6	<input type="checkbox"/> Area 19		
	<input type="checkbox"/> Area 20		

Please provide rationale as to why you think the selected areas should be managed separately here. If you think that specific parts of any individual area should be managed in a certain way, please specify below:

HISTORIC FISHING RIGHTS. THE SANDS AND THE BURROUGHS HAVE BEEN PRIME AREAS. BY GIVING THE OTHER AREAS UP TO THE CFFPB WILL ALLEVIATE PRESSURE ON THE TECFO. THE CFFPB NEEDS TO BE PROPERLY SURVEYED AND OPENED UP ALONGSIDE THE TECFO, WITH VMS FITTED TO ALL VESSELS. TECFO BOATS SHOULD NOT FISH IN THE CFFPB

S3B8. Do you think there would be any advantage of phasing in new regulations over a number of years or in stages? If so, specify how long and explain why.

NO. I THINK MAKE THE DECISION MAKE IT A BYELAW THEN IT CAN BE ALTERED AND UNDER MORE CONTROL BY KEIFCA.

S3B9. Any other comments or thoughts on regulatory options including types of legislation, spatial and temporal variations?

I THINK PERMIT FISHERY TO GIVE CONTROL BACK TO KEIFCA AND HAVE MORE POWER.
MAYBE FIVE YEAR IF NEEDS BE.

C. Access to the cockle fisheries – licences and permits

This section seeks to gather views and data on the framework that could manage access to future cockle fisheries. As outlined in section A, there is an established survey and management process, that has been running over a number of years, and can produce a Total Allowable Catch (TAC) for a specified area. How access is managed, including how many licences/permits are issued, how TAC is divided between licences/permits, who gets a licence/permit, for how long and under what conditions, are all vital questions that will need to be resolved in developing future management not least as they will all have an impact upon the Marine Protected Areas which the cockle fisheries take place within.

How licences are issued under the current TECFO system

The Thames Estuary Cockle Fishery Order was set-up in 1994 and issued licences under the Regulating Order legislation. Licences were issued to people that could provide written evidence (in the form of sales notes) of commercially fishing for cockles in the then proposed TECFO area. Twelve licences were initially issued and as the cockle stocks increased two more licences were issued under a temporary licence in 1997 following an assessment of the activities of all persons who demonstrated an interest. When stocks fell and the temporary licences were not issued, the temporary licence holders took Kent and Essex Sea Fisheries Committee (KESFC) (KEIFCA's predecessor) to Judicial Review. KESFC lost the Judicial Review which in effect meant that temporary licences had the same legal standing as standard licences.

KESFC sought extensive legal advice as concerning the process and legal consequence of issuing new licences, as well as the legitimate expectation of the licence holders. The practical consequence of that legal advice meant that for the last 23 years KEIFCA has issued 14 licences to fish in the TECFO and the annual TAC has been divided evenly between the licence holders.

How permits are issued under the KEIFCA cockle fishery flexible permit byelaw (CFFPB).

The KEIFCA cockle fishery flexible permit byelaw (CFFPB) was confirmed in 2014 and brought together a number of different byelaws that had been used to manage the cockle fishery outside the TECFO area. To gain access to the fishery and become a permit holder, applicants need to provide identification and vessel details as well as pay a permit fee by the 31 March.

If the survey data indicates that the available stock is in excess of the criteria in the management plan, and the authority decides to open the fishery, then the available TAC is equally divided by the number of permit holders. Permits are issued on a yearly basis and if the fishery is not opened the licence fee is returned to the applicant.

S3C1. How do you think permissions to access the fisheries (permits/ licences) should be issued?

ON PREVIOUS APPLICATIONS, AND WHERE FISHERMAN ARE BASED KEIFCA IS KENT AND ESSEX

S3C2. Do you think there should be criteria to decide who should have a permit/licence to fish or do you think it should be open to all?

Yes there should be criteria

S3C3. If you think there should be criteria, what criteria do you think there should be? (Tick all that apply)

- Those who have had a permission to fish for cockles in the TECFO
- Those who have had a permit to fish in the CFFPB
- Those who have commercially fished for any species in the Thames
- Those who have commercially fished for any shellfish in the Thames
- Those who have fished for cockles anywhere else
- Other

If 'other' please provide details:

[Click or tap here to enter text.](#)

S3C4. Do you think criteria should be weighted or have scores assigned to them? Please provide details

NO THE TECFO SHOULD STAY AS IS. SKIPPERS/CREW WHO CURRENTLY FISH THE TECFO SHOULD BE ALLOWED TO APPLY FOR A CFFPB PERMIT SHOULD THEY WISH.

S3C5. Do you think a licence/ permit should have to be in a person's name or could it be in a company name?

Choose an item.

Please provide the reasons for your answer here:

I THINK A COMPANY NAME WITH ANY CHANGE OF SHAREHOLDERS, OR DIRECTORS APPROVED BY KEIFCA IF POSSIBLE. THE PERMIT SHOULD BE NON RENEWABLE SO SHOULD ANYTHING SINISTER HAPPEN IT CAN BE REVOKED.

S3C6. How many licences/ permits do you think should be issued in the current TECFO area? Why?

14 AS AI, THE GROUND WONT TAKE EXTRA PRESSURE, NO FAIR WAY OF ISSUING A COUPLE OF LICENCES. YEARS AGO IT ENDED UP IN A BIG COURT CASE.

S3C7. How long do you think a licence/permit should be issued for?

1 year <input checked="" type="checkbox"/>	3 years <input type="checkbox"/>	5 years <input type="checkbox"/>	7 years <input type="checkbox"/>	10 years <input type="checkbox"/>	30 years <input type="checkbox"/>	Other <input type="checkbox"/>
---	-------------------------------------	-------------------------------------	-------------------------------------	--------------------------------------	--------------------------------------	-----------------------------------

Please say why here:

YEARLY FOR CFFPB UNLESS NUMBERS ARE TO BE LIMITED, IT WILL DISCOURAGE EVERYONE FROM APPLYING, AND MEAN THAT ANY VESSELS BREAKING THE LAW CAN BE EASILY BANNED FROM THE FISHERY.

S3C8. If licences/permits were to be issued through a bidding process, what would your thoughts and comments be?

NO I WONT BE PART OF THAT, AND DON'T THINK IT IS MORALLY RIGHT.

S3C9. If the annual cost of licences/ permits included an amount to help support the wider fishing industry (a community fund for example), what would your thoughts and comments be?

YES PUT SOME MONEY ASIDE, TO TRY MORE EFFIECIENT GEAR, SUPPORT SAFETY, PROVIDE SOME FINANCIAL HELP TO OTHER FISHERMEN IN HAVING SAFE BOATS, AND HELPING THEM GET THEIR PRODUCTS TO MARKET AT THE BEST PRICE.

S3C10. If new fishermen are going to enter the fishery, fishermen would also have to leave the fishery, otherwise the fishery just gets bigger and bigger. How do you think this should work?

For people to be able to enter the fishery

EVERYONE IN KEIFCA IS IN THE FISHERY, EITHER WITH A BOAT OR WITH ACCESS TO A BOAT, THE FISHERY WONT GET BIGGER AS LICENCES ARENT AVAILABLE. IF YOU DON'T CURRENTLY HAVE ACCESS OR OWN A LICENCED BOAT THEN I DON'T THINK YOU CAN APPLY. THE PERMIT SYSTEM AND NUMBERS COULD BE REVIEWED AFTER A CERTAIN PERIOD.

For people to leave the fishery.

PEOPLE NATURALLY COME AND GO. THE PEOPLE WHO WANT TO COME IN NOW ARE ONLY THERE AS IT IS PROFITABLE, THEY WOULDN'T BE THERE IF IT WASN'T. CERTAIN BOATS FROM OTHER DISTRICTS WOULD SMASH THE GROUNDS TO PIECES, AND DON'T CARE FOR RULES AND MANAGEMET

S3C11. If new licences/permits are issued, who do you think they should go to? (in priority order)

1. FOR TECFO AS IS 14 LICENCES
2. FOR CFFPB :- A. NON TECFO BOATS, B. BUSINESSES/INDIVIDUALS WITHIN THE DISTRICT WHO HAVE APPLIED PREVIOUSLY. C. OTHER BUSINESSES/INDIVIDUALS WHO HAVE APPLIED PREVIOUSLY

S3C12. There are a number of businesses that have been fishing for cockles in the TECFO area for over 30 years and have business models that rely on that activity. How do you think this should influence how fishing opportunities are allocated?

THEY SHOULD STAY AS IS AS THEY HAVE BUILT THEIR LIVES AND SOME INVESTED A LOT OF MONEY IN THE INDUSTRY AND MADE IT A SUCCESS. HOWEVER, BEING PERMIT FISHERY MIGHT MAKE THEM CONSIDER OTHER FISHERMAN A LITTLE, AND MAYBE STOP SOMES BLASÉ ATTITUDE.,

S3C13. What could we do to make the fishery greener? Explain how for each category.

Boats	ENSURE CATCH TIMES ARE ENFORCED TO REDUCE FUEL BURNT AND GROUND DAMAGED, INVEST IN ALTERNATIVE ENGINES ON YOUR BOATS AS A TRIAL, LIKE THE PLA ETC ARE TRYING TO DO.
Transport	PROCESS LOCALLY
Logistics	HAVE LOCAL OFFICER IN PORT SO NOT TOO MUCH TRAVEL ALL OVER THE KENT AND ESSEX.
Company Statement – CO2 footprint offset	N/A
Any other comments	NO

S3C14. Any other comments or thoughts on access to fisheries?

MY INTERVIEW, WAS A BIT OF A MUDDLE ON REFLECTION, I FEEL LIKE I WAS TALKING CROSS PURPOSES. 1. I WOULD LIKE THE FISHERIES TECFO AS IS, WITH PERMITS (14) AND MAYBE SOME GROUND GIVEN UP. 2. OUTSIDE AREA PERMITS FISHERY, WHERE VESSELS WITHIN THE DISTRICT, CAN APPLY FOR PERMITS. IF PEOPLE HAVE NOT APPLIED TO FISH OUTSIDE THE AREAS BEFORE THEN THEY SHOULD BE CONSIDERED LAST WHEN MAKING A DECISION ON NUMBER OF PERMITS. THEREFORE FISHERMAN THAT DON'T CURRENTLY HAVE SUCTION GEAR CAN FIT OUT IF THEIR VESSEL ALLOWS IT.

D. The economics of the cockle fisheries

Catching sector

S3D1. How much does it cost to run a cockle boat each year?	£ N/A NOT IN THE CATCHING SECTOR
S3D2. What kind of turnover do you need to make your business viable?	£ N/A NOT IN THE CATCHING SECTOR
S3D3. What kind of annual quantity of cockles do you need to make your business viable?	N/A NOT IN THE CATCHING SECTOR
S3D4. How many people do you employ in your catching operations?	N/A NOT IN THE CATCHING SECTOR
S3D5. How many additional on-shore jobs does your cockle fishing business support?	N/A NOT IN THE CATCHING SECTOR
S3D6. What percentage of your turnover is related to fishing for cockles in the KEIFCA District?	N/A NOT IN THE CATCHING SECTOR

Processing Sector

S3D7. What do you need out of the fishery?

N/A NOT IN THE PROCESSING SECTOR

S3D8. What is the maximum demand from the Thames cockle fisheries (in terms of tonnage) by the market?

N/A NOT IN THE PROCESSING SECTOR

S3D9. How many people do you employ in your processing operations?	Full time N/A NOT IN THE PROCESSING SECTOR
	Part time N/A NOT IN THE PROCESSING SECTOR
	Number of months per year part time workers are employed N/A NOT IN THE PROCESSING SECTOR

All sectors

S3D10. Describe the investment you have put into the KEIFCA District cockle fisheries over the last 10 years?

SPENT THOUSANDS RIGGING UP, BUILT ALL OUR OWN GEAR, ALWAYS HAD A LICENSED FISHING VESSEL, WHEN MY VESSEL REGISTRATION WAS REVOKED BECAUSE I COULDN'T AFFORD TO FINISH MAKING IT SEA WORTHY IN THE REQUIRED TIME, DUE TO HAVING TO EARN MONEY, THEN I INVESTED IN THE REVENGE AND APPLIED TO WORK THAT BOAT AS SKIPPER WITH FRUITS OF THE SEA.

S3D11. Is there anything that could be done to make the KEIFCA District cockle fisheries more cost efficient?

NOT AT THIS TIME

S3D12. Is there anything that could be done to bring in or create more jobs based in KEIFCA district?

Click or tap here to enter text.

S3D13. What would be the impact on you and your business if the current management systems were to be extended for a further 5 years/ 10 years/ 30 years?

NO IMPACT TO ME. IT WOULD JUST MEAN THAT I WOULD HAVE A SUCTION DREDGER THAT WOULDN'T WORK MUCH. I WOULD WANT TO INVESTIGATE CLAMS WITH MY CONVEYOR DREDGE ETC.

S3D14. What would be the impact on you and your business if there was a yearly permit issued for the current TECFO area using similar criteria to the current KEIFCA cockle permit fishery?

NO IMPACT.

S3D15. Any other comments or thoughts on the economics of the fisheries?

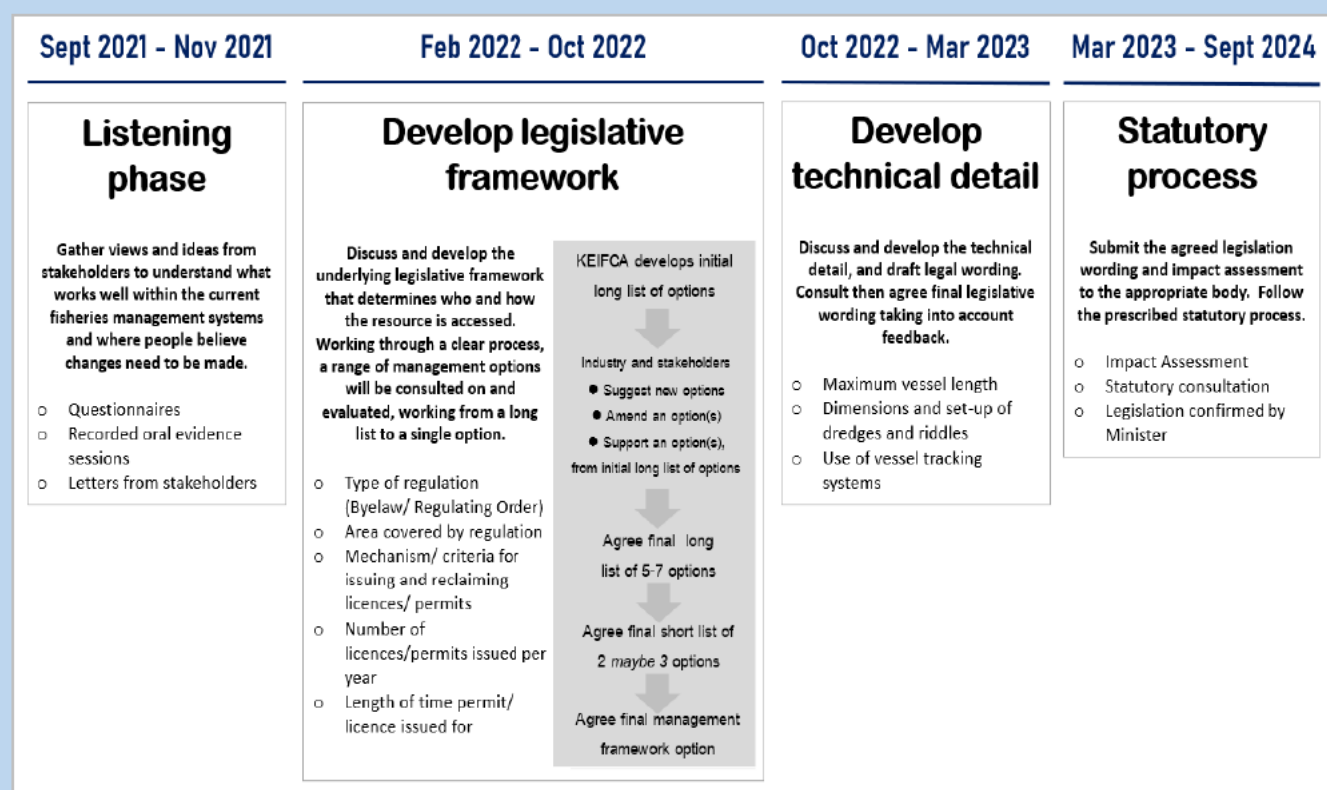

DON'T LOOK AT THE NOW, IT WASN'T ALWAYS A LUCRATIVE INDUSTRY, AND STOCKS COULD DISAPPEAR OVER WINTER, THAT IS A RISK THAT THE FISHERMAN TAKE.

E. The proposed process for reviewing and developing future cockle management

The cockle fisheries are one of the most important but complex fisheries in the KEIFCA district. The fisheries take place within a complex mosaic of Marine Protected Areas (MPAs) and the cockle stocks provide food for a wide range of bird and fish species, whilst also providing other functions like filtering water and capturing CO2 in their shells. The cockle fishery provides income and jobs for a large number of fishermen and, with seaside towns like Leigh-on-Sea and Whitstable, provide tourist and cultural links between the cockle fishery and the wider society. Although it is complex, we do want to hear and gather views on how the cockle fisheries could be run in the future from a wide spectrum of stakeholders that are involved and impacted by the fishery.

Process outline

The proposed process to review and develop future cockle management, is split into a number of time defined steps that will build on each other (below), with the overall aim of confirming new legislation (in whatever form it might look like) to be in place for when the current TECFO legislation ends in September 2024.

The first step is to undertake a specific listening and evidence gathering exercise, the second step looks at the framework of any future fisheries management, the third step develops the technical detail and final wording of any proposed legislation, and the fourth step takes the proposal through the statutory consultation and confirmation process of the agreed new legislation. With each step we have identified provisional processes and meeting dates, with the aim of setting out a clear process that helps everyone understand when, where and what could be decided at each stage.

For more detail, including potential engagement events and dates please follow this link:

<https://www.kentandessex-ifca.gov.uk/news/review-of-management-of-cockle-fisheries-in-the-kent-and-essex-ifca-district>

S3E1. Do you have any thoughts or comments with the proposed process for reviewing and developing new cockle fisheries management in the TECFO area and the wider KEIFCA district?

NO I THINK THATITS GOOD TO BE AHEAD OF THE GAME AND REVIEWING EARLY.

S3E2. Are there any changes you would make to the provisional review process outlined above?

NO

S3E3. Does the process provide a mechanism to adequately address the key issues as you see them?

YES

S3E4. How can we best represent your views during the review process?

JUST WITH THE COMMITTEE, AND TRANSPARENCY. LET EVEYONE KNOW WHAT YOU ARE DOING AND WHY. IF LETTERS TO KEIFCA ARE MADE AVAIALBLE TO COMMITTEE MEMBERS AND SHARED, THEN THIS ISNT RIGHT, AND MAKES A MOCKERY OF KEIFCA AND THEIR PROFESSIONALISM. IF LETTERS OPINIONS ARE SHARED OUTSIDE OF THE COMMITTEE, THEN PUBLISH ALL THE LETTERS AND QUESTIONNAIRES, SO THAT IS NON BIASED, AND EVERYONE HAS A CHANCE TO READ AND REFLECT ON THE INDUSTRIES OPINIONS.

S3E5. Any other comments or thoughts on the review and development process?

NO

Thank you for taking the time to complete this questionnaire. Your responses are invaluable in helping us to review the current management of cockle fisheries within the KEIFCA District, and in helping us develop new management for the future.
