

## Agenda item B12

By: Assistant Chief IFCO  
To: Kent and Essex IFCA – 24<sup>th</sup> November 2015  
Subject: Crisis Management Plan Update  
Classification: Unrestricted

---

Summary: To report on progress made on the development of a crisis management plan

---

Following the Authority's approval of the development of a crisis management plan, officers have continued to work on the refinement of that plan and have also undertaken some training in the form of attending other organisations' crisis drill event.

Officers attended Medway Ports Oil Spill exercise 'Operation Beowulf', and have also been involved in a similar exercise with London Gateway Port. These exercises have helped officers to define the necessary processes and protocols for working with other organisations in the event of a crisis.

Further work will now be carried out on developing the crisis management plan, the policies that surround it and how it sits within the health and safety documentation which is due for review by the Authority in 2016.
